

MATERIALS TESTING AND INSPECTION

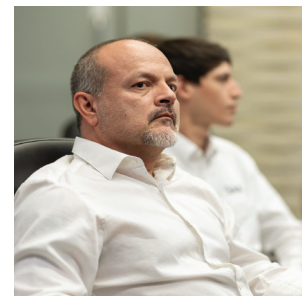

RENEWABLES

ENSURING QUALITY AT EVERY STAGE

SAM can deliver the Quality Assurance and Quality Control (QA/QC) oversight and materials testing needed to keep your renewable program compliant, on time, and on-budget. Across the country, our crews can capture program-driven metrics and implement clear communication across teams, improving quality every client. With 30+ locations nationwide and deep experience in both materials testing and the renewables industry, we bring a wealth of local knowledge and partner networks to your programs.

SAM has built a strong reputation for professionalism and quality work in the renewables industry, and our partnerships with clients have contributed to 34 wind, 195 solar, and 51 battery storage projects in 2021 alone. With decades of experience and deep industry knowledge, we have a long history of bringing renewable energy to the grid and helping clients meet their Environmental, Social, and Governance (ESG) goals.

Materials Testing and Inspection, Combined //

Ensuring a solid foundation for your program is crucial, and the quality of the inspection is one step you can take to secure your investment.

As infrastructure inspectors, we offer a higher level of inspection and documentation than a lab tech can deliver, and understand the broader context of materials testing.

Our proprietary application SAM Field™ enables better communication and data storage by allowing real-time delivery of collected data.

This data can then be more easily analyzed to identify trends in quality and recommend infrastructure process improvements—meaning better quality and on-time delivery.

Local Knowledge //

Our team members are already familiar with state and local requirements through firsthand experience, from local municipality improvement projects to privately-funded endeavors.

KEY SERVICES

- Quality Assurance/Quality Control (QA/QC)
- Materials Testing Planning and Coordination
- Inspection and Testing of Soil Density
- Concrete Testing and Inspection
- Steel Inspection
- SWPPP Inspection
- Recording of Program Conditions Before and During Building
- Contract Compliance Oversight
- Delivery and Haul Roadway Monitoring
- Drone Inspection Services
- Program Records Auditing
