

UTILITY MAPPING AND COORDINATION //

RENEWABLES

ACCURATE, AS-BUILT DOCUMENTATION

SAM's utility location and coordination services provide the most complete picture of existing site infrastructure, giving owners and developers the confidence to move forward with planning, design, and utility relocation. We are fully capable of adapting to your program's needs and providing geospatial solutions unique to your site. As one of the most respected utility mapping and coordination firms in the nation, SAM brings the most experienced teams and advanced technology to renewable programs across the country.

sam.biz

SAM has built a strong reputation for professionalism and quality work in the renewables industry, and our partnerships with clients have contributed to 34 wind, 195 solar, and 51 battery storage programs in 2021 alone. With decades of experience and deep renewables industry knowledge, we have a long history of bringing renewable energy to the grid and helping clients meet their Environmental, Social, and Governance (ESG) goals.

ADVANCED TECHNOLOGY & TAILORED SOLUTIONS

As a partner, we support you with permitting, coordination with utility owners, and can even adapt our deliverables to meet your specific needs.

We recognize every site is different. We bring a suite of equipment to your site, including magnetic, sonic, and acoustic technologies, ground penetrating radar, and radio frequency detection, and utilize the most efficient means to designate, locate, and map existing and abandoned utility infrastructure.

By helping our clients establish as-built site conditions and determine the depth of existing utilities, we greatly enhance program safety and minimize expensive delays and change orders.

KEY SERVICES

- Record Research / Data Collection
- Visible Surface Feature Geomatics
- Utility Locating and Marking
- Non-Destructive Vacuum Excavation
- CAD Plan Preparation
- Utility Design/Specification
- Utility Relocation Plans
- Agreement Assembly and Processing
- Federal, State, and Local Utility Procedures + Documentation
- Subsurface Utility Engineering (SUE) + Utility Conflict Resolution
- Conducting Meetings with Utility Owners, Designers, Contractors, and Client
- Permit Acquisition
- Utility Crossing Agreement
