

A person wearing glasses is seen from the side, looking at a computer workstation. The workstation features two monitors. The left monitor displays an aerial photograph of a city street grid. The right monitor displays a 3D visualization of a cable-stayed bridge, with a color-coded heatmap overlaid on the structure, likely representing stress or temperature data. The background is a dark blue wall with a geometric pattern of triangles.

TECHNOLOGY-BASED INFRASTRUCTURE SOLUTIONS

1000+ Employees

THE LEADER IN MANAGED GEOSPATIAL SERVICES™

SAM has built a reputation as a trusted, knowledgeable, and innovative partner. SAM transforms petabytes of complex spatial data into intelligent insights through a holistic Managed Geospatial Services™ framework. As North America's premier MGS™ company, SAM provides practical, precise, and high-fidelity solutions designed to enhance decision-making, mitigate risks, achieve strategic objectives, and drive costs out of our client's business. SAM's vision is to advance spatial data acquisition, improve analysis capabilities, and develop predictive analytics to redefine and transform how infrastructure assets are developed and managed throughout their lifecycles.
