

SAM

UTILITY COORDINATION //

UTILITY ENGINEERING

SAM's utility coordination services provide the most complete picture of existing site infrastructure, giving owners and developers the confidence to move forward with planning, design, and utility relocation.

SAM has a reputation for delivering exceptionally reliable data fast, reducing downstream conflict and helping programs meet even the tightest schedules. As one of the most experienced utility coordination teams in the nation, SAM is the partner of choice for program owners around the nation.

Experience across a range of solutions

With deep expertise in infrastructure services, our team of licensed engineers, program managers, and utility coordinators can help you in a variety of ways: moving concept development, conflict identification, engineering design, and preliminary infrastructure activities forward with speed and efficiency—and in accordance with pertinent regulations.

What differentiates SAM?

SAM has built a reputation as a trusted, knowledgeable, and innovative partner. SAM transforms petabytes of complex spatial data into intelligent insights in a holistic Managed Geospatial Services™ (MGS™) framework. As North America's premiere MGS™ company, SAM provides practical, precise, and high-fidelity solutions designed to enhance decision-making, mitigate risks, achieve strategic objectives, and drive costs out of our client's business. Our vision is to advance spatial data acquisition, improve analysis capabilities, and develop predictive analytics to redefine and transform how infrastructure assets are developed and managed throughout their lifecycles.
